## Summary

I am a Full-stack Developer, I have experience in free-lance projects and volunteer projects. I was responsible for creating Single Pages Applications (SPAs) using React Router, performing refactorings to improve code responsiveness, readability and scalability. For projects that required my backend, I used node.js (I have experience with both javascript and typescript.) along with react for better scalability, for the database I used integration libraries such as prism, postgresql and mongodb using SQLite and SQL, for validations I use the zod library. I have experience using the Figma tool for styling and structuring wireframes and prototypes. To improve my back-end, I am improving very renowned technologies, such as Python.

---

## Professional Journey

### **Togyro Group Victory – React Developer free-lancer.**

*Start-up specialized in Web development.*

02/2023 – 01/2024 (11 months)

React Developer - Freelance

- Creation of SPAs using the React Router lib
- File refactoring to improve code responsiveness, readability and scalability Fix bugs in production
- integration using typescript, node and postgresql
- [Link to company portfolio](#)
- Technologies: React, Node, Typescript, Tailwind CSS, CSS, Git, Figma and Postgress.

### **Sempretec Solucoes LTDA – Voluntary project on ecology**

*Technology company from Brazil that had an ecology project.*

10/2022 – 11/2022 (2 months)

Web Developer – Freelance

- Developed a new application in React from scratch
- Unit testing using Jest
- Fix bugs in production
- I learned Node for Backend
- [Link for the project](#)
- Technologies: React, Tailwind CSS, Radix, and Node.

---

## Academic Trajectory

02/2022 – 11/2024

**Faculdade Descomplica**

Systems Analysis and Development

03/2023 – 03/2024

**Rocketseat**

HTML, CSS, Javascript, React, Typescript, Node – Certification
